

Figure 26-b. Advanced WHOIS search options for refined output.

Command	Description
ID	Search on ID field of an object. This is applied to Contact IDs and registrar IDs.
Full or '=':	Always show detailed results, even for multiple matches.
Summary or SUM	Always show summary results, even for single matches.
'%' or '...'	Used as a suffix on the input, will produce all records that start with that input string.
'_'	Used as a suffix on the input, will produce all records that start with that input string and have one and only one additional character.
