Question 27 Registration Life Cycle

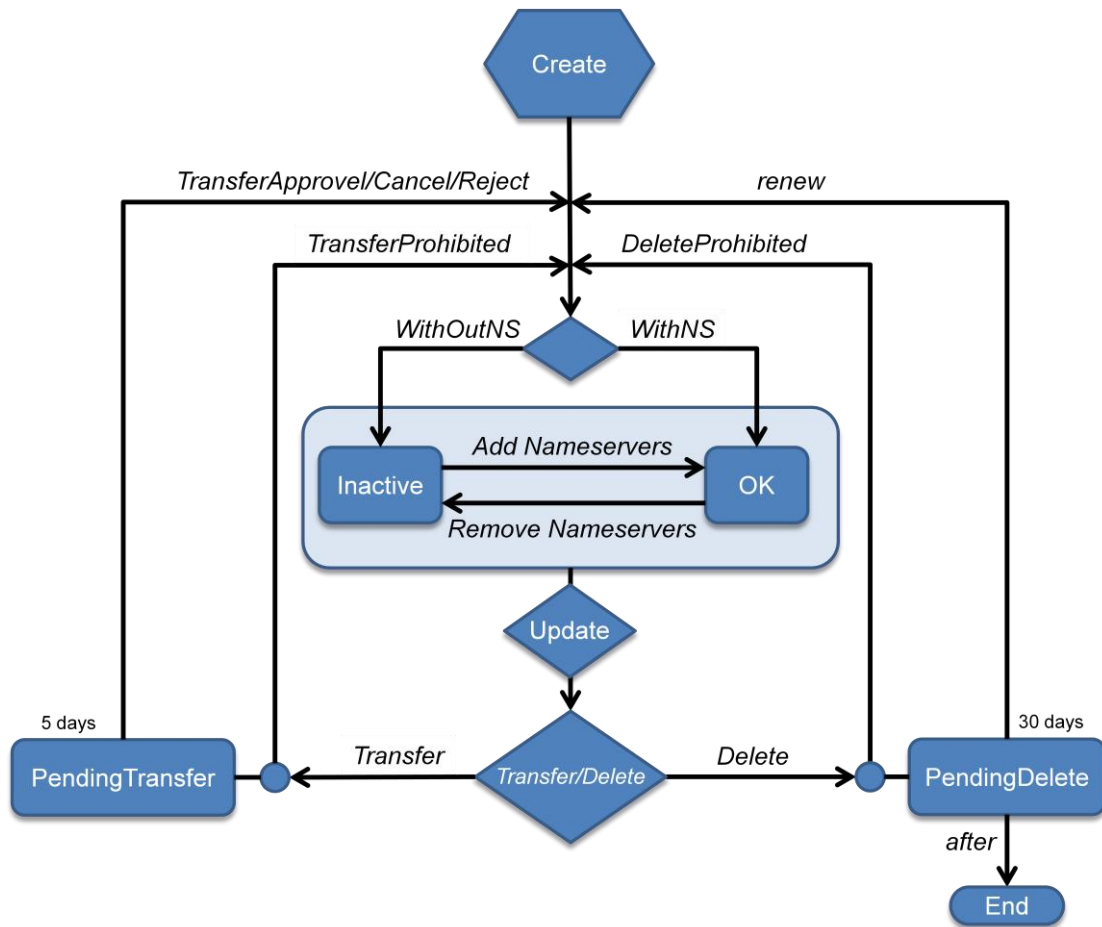

Figure 27-1 Domain Name Lifecycle
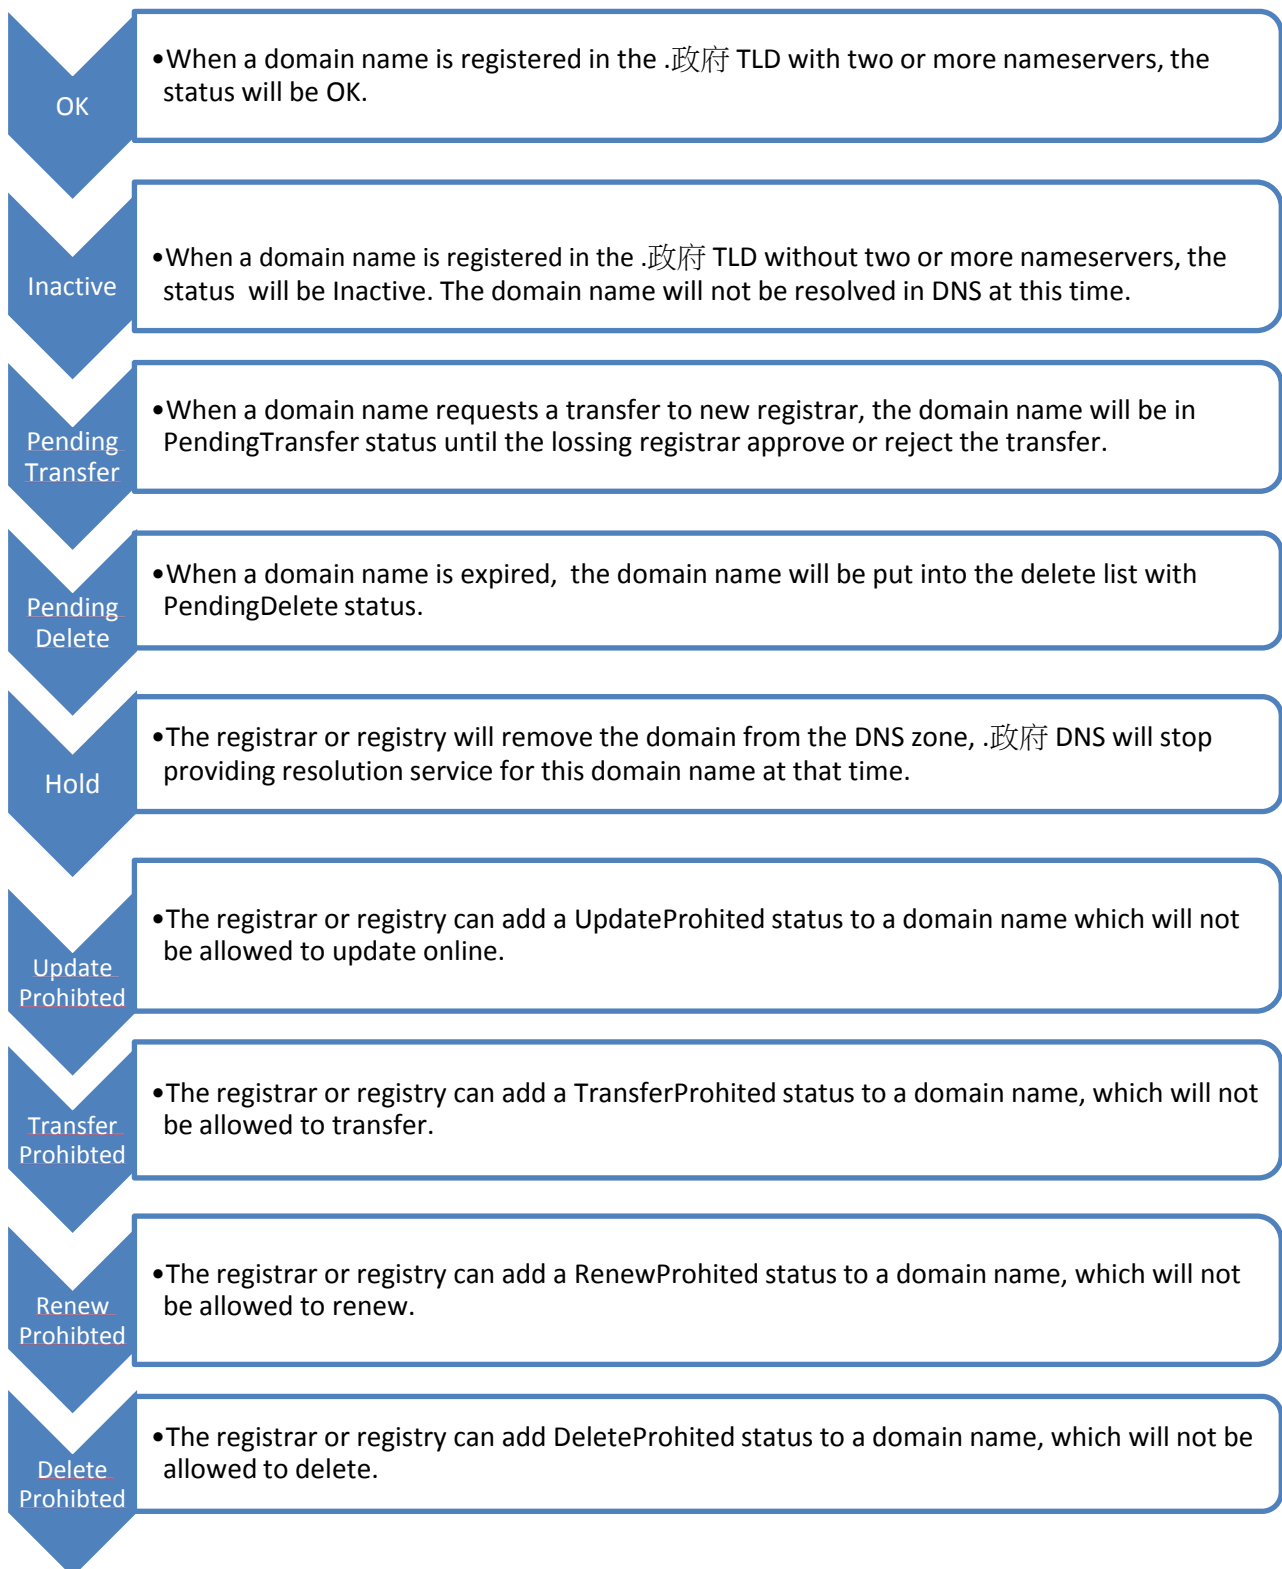

OK
- When a domain name is registered in the .政府 TLD with two or more nameservers, the status will be OK.

Inactive
- When a domain name is registered in the .政府 TLD without two or more nameservers, the status will be Inactive. The domain name will not be resolved in DNS at this time.

Pending Transfer
- When a domain name requests a transfer to new registrar, the domain name will be in PendingTransfer status until the lossing registrar approve or reject the transfer.

Pending Delete
- When a domain name is expired, the domain name will be put into the delete list with PendingDelete status.

Hold
- The registrar or registry will remove the domain from the DNS zone, .政府 DNS will stop providing resolution service for this domain name at that time.

Update Prohibted
- The registrar or registry can add a UpdateProhited status to a domain name which will not be allowed to update online.

Transfer Prohibted
- The registrar or registry can add a TransferProhited status to a domain name, which will not be allowed to transfer.

Renew Prohibted
- The registrar or registry can add a RenewProhited status to a domain name, which will not be allowed to renew.

Delete Prohibted
- The registrar or registry can add DeleteProhited status to a domain name, which will not be allowed to delete.
