Letter of Support

Dear Dr. Antwerpes,

we support your initiative to establish the top-level domain ".med" as an Internet address for medical content. The domain .med would assign members of the healthcare industry and medical institutions on the Internet with their own, clearly identifiable address. The top-level domain .med could be established as a quality standard if it were exclusively at the medical community's disposal.

For this reason we are backing the application of DocCheck with the ICANN as registrar of the domain. We believe that DocCheck is able to manage the domain as a trustee of the medical community and provide for the exclusivity of the top-level domain .med for medical content.

Best regards,

Christian Lautner
