Gordon Paddy  
Global Switch  
400 Harris St  
Ultimo NSW 2007

Dear Gordon

**Global Switch base building compliance with Intruder Resistant Area standard**

After inspection of the Global Switch base building on the 23<sup>rd</sup> October 2007, we are pleased to advise that the security of the base building complies with the intent of the Commonwealth Government Protective Security Manual, Section E, Intruder Resistant Area Standard. The building perimeter has a tamper evident envelope and the building is capable of limiting access only to authorised persons.

This assessment is contingent on the continuation of the existing physical and electronic security measures employed at the site, coupled with a 24/7 security guard force presence.

Regards

**Nigel Grist**  
SCEC Endorsed Security Consultant
