

NOTES:

1) A one (1) day Grace period applies to all registrations, Provisional (pending activation) registrations. If a name is Activated the Grace Period is instantly expired. This policy effectively mitigates the prospect of abuse of the gTLD or CoCCA's SRS for domain tasting, kiting or other similar activity, while allowing a registrar 24 hours to reverse a registration that included a typographical error or was found to be fraudulent without incurring a commercial penalty.

2) All Registrations are Provisional and excluded from the zone until the Registrant a) confirms with the registry (by automated mechanisms) the accuracy of the WHOIS data lodged with CoCCA by the Registrar and b) reads and agrees to the TLD policy. CoCCA's validation will record and make part of the domains record the details of activation – date, time, IP, outcome.

3) Registrants also validate the accuracy of the WHOIS data with CoCCA within 28 days or renewal or the anniversary of registration or a domain is Suspend and Parked by CoCCA until they do.
