GTLD REGISTRATION TERMS GUIDELINES

This TLD operates with an open registrant policy with general intended registration terms available for a fixed term of 1, 2, 5 and 10 years registrations. Renewal terms can be specified in any yearly amount on the condition that the total registration term does not exceed 10 years registration.

It is intended that the Sunrise period will offer applicants fixed term registrations of one or two year's registrations.

It is intended that the Landrush period will offer applicants a fixed term of two year registrations.

While this process has not been formalized, it is our intention to offer registrations terms that are suitable to the end user as well as ensuring that implementing fixed registration terms will be done in accordance with ICANNS recommendations and published policies.
