Note: “.ECO Community Organization” in attached letters refers to the formally named “Dot ECO Global Community Organization”.

Big Room Inc. Application number 1-912-59314 .ECO Community TLD
April 6, 2012

Re: The .ECO Top-Level Domain

Dear ICANN,

350.org is building a global grassroots movement to solve the climate crisis. Our online campaigns, grassroots organizing, and mass public actions are led from the bottom up by thousands of volunteer organizers in over 188 countries. 350.org works hard to organize in a new way—everywhere at once, using online tools to facilitate strategic offline action.

As a member of the global environmental community we are writing to express support for the creation of the “.eco” top level domain as proposed by Big Room Inc.

The community to be served by Big Room’s application - and the community that would be implicitly targeted by any application for “.eco” - is an alliance of diverse, long-established, and internationally recognized environmental institutions with millions of members worldwide.

Formal international evidence of this community dates back to 1948 with the founding of the International Union for the Conservation of Nature. The community has come together and organized itself with respect to specific issues over the years through a variety of formal and informal alliances including, for example, the Climate Action Network, 350.org, the Antarctic and Southern Ocean Coalition, and since 1972, the United Nations Environment Programme.

The .ECO Community Organization reflects the community’s long-standing reliance on and use of the multi-stakeholder model to pursue community-wide goals, and is the appropriate voice to ensure that .ECO operates in furtherance of the goals, values, and interests of the environmental community.

The “ECO” label has long been used to associate individuals, organizations, and activities committed to respectful, responsible, and sustainable use of the environment. Because use of the “ECO” label is widely understood as a representation of association with the community’s goals and values, and in order to avoid consumer confusion, it is imperative policy setting responsibility for the TLD be invested in a representative organization that can provide stable and ongoing environmental community input and oversight.

We look forward to participating in the long-term governance of this community resource, for the greater good.

Sincerely,

Re: The .ECO Top-Level Domain

Dear ICANN,

Amazon Watch is a nonprofit organization that protects the rainforest and advances the rights of indigenous peoples in the Amazon Basin. We partner with indigenous and environmental organizations in campaigns for human rights, corporate accountability and the preservation of the Amazon's ecological systems. As a member of the global environmental community, we are writing to express support for the creation of the "eco" top level domain as proposed by Big Room Inc.

The community to be served by Big Room’s application - and the community that would be implicitly targeted by any application for "eco" - is an alliance of diverse, long-established, and internationally recognized environmental institutions with millions of members world-wide.

Formal international evidence of this community dates back to 1948 with the founding of the International Union for the Conservation of Nature. The community has come together and organized itself with respect to specific issues over the years through a variety of formal and informal alliances including, for example, the Climate Action Network, 350.org, the Antarctic and Southern Ocean Coalition, and since 1972, the United Nations Environment Programme.

The .ECO Community Organization reflects the community’s long-standing reliance on and use of the multi-stakeholder model to pursue community-wide goals, and is the appropriate voice to ensure that .ECO operates in furtherance of the goals, values, and interests of the environmental community.

The "ECO" label has long been used to associate individuals, organizations, and activities committed to respectful, responsible, and sustainable use of the environment. Because use of the “ECO” label is widely understood as a representation of association with the community’s goals and values, and in order to avoid consumer confusion, it is imperative policy setting responsibility for the TLD be invested in a representative organization that can provide stable and ongoing environmental community input and oversight.

We look forward to participating in the long-term governance of this community resource, for the greater good.

Sincerely,

Paul Paz y Miño
Managing Director
Amazon Watch
Re: The .ECO Top-Level Domain

Dear ICANN,

ANPED, Northern Alliance for Sustainability is a network of over 60 NGOs working on Sustainable Development in the UNECE region (Central Asia, Russia, eastern Europe, Western Europe, USA and Canada).

As a member of the global environmental community we are writing to express support for the creation of the “.eco” top level domain as proposed by Big Room Inc.

The community to be served by Big Room’s application - and the community that would be implicitly targeted by any application for “.eco” - is an alliance of diverse, long-established, and internationally recognized environmental institutions with millions of members world-wide.

Formal international evidence of this community dates back to 1948 with the founding of the International Union for the Conservation of Nature. The community has come together and organized itself with respect to specific issues over the years through a variety of formal and informal alliances including, for example, the Climate Action Network, 350.org, the Antarctic and Southern Ocean Coalition, and since 1972, the United Nations Environment Programme.

The .ECO Community Organization reflects the community’s long-standing reliance on and use of the multi-stakeholder model to pursue community-wide goals, and is the appropriate voice to ensure that .ECO operates in furtherance of the goals, values, and interests of the environmental community.

The “ECO” label has long been used to associate individuals, organizations, and activities committed to respectful, responsible, and sustainable use of the environment. Because use of the “ECO” label is widely understood as a representation of association with the community’s goals and values, and in order to avoid consumer confusion, it is imperative policy setting responsibility for the TLD be invested in a representative organization that can provide stable and ongoing environmental community input and oversight.

Sincerely,

Re: The .ECO Top-Level Domain

Dear ICANN,

BirdLife International is a global Partnership of conservation organisations that strives to conserve birds, their habitats and global biodiversity, working with people towards sustainability in the use of natural resources. We're the World's largest partnership of conservation organisations. BirdLife Partners operate in over one hundred countries and territories worldwide, and collaborate on regional work programmes in every continent.

As a member of the global environmental community we are writing to express support for the creation of the .eco top level domain as proposed by Big Room Inc.

The community to be served by Big Room's application - and the community that would be implicitly targeted by any application for .eco - is an alliance of diverse, long-established, and internationally recognized environmental institutions with millions of members world-wide.

Re: The .ECO Top-Level Domain

Dear ICANN,

B Lab is a non-profit organization that uses the power of business to solve social and environmental problems. B Lab focuses on company level certification of "B Corporations", awarding the third party seal of approval to over 500 companies who have met a minimum performance standard for positive impact with all stakeholders, including their employees, the community, customers, shareholders, and the environment (www.bcorporation.net). B Lab works to support public policy and the development of a new corporate form, entitled "Benefit Corporations", now recognized in 7 US States (www.benefitcorp.net). B Lab also collaborates in the impact investing space, creating a new standard for measuring social and environmental performance, enabling capital to move towards social enterprise, this initiative is known as the Global Impact Investment Ratings System (www.giirs.org).

As a member of the global environmental community we are writing to express support for the creation of the "eco" top level domain as proposed by Big Room Inc.

B Lab has been engaged with the .ECO Community Council and its policy development, outreach, and planning work since January 2011. We support Big Room’s efforts to create multi-stakeholder platform for the .ECO application and the policies which have developed as a result of this approach. B Lab believes that the .ECO domain is unique in it's identity and it's potential to have a positive impact on the world around us, and therefore needs to be managed responsibly. We believe the Big Room Inc. proposal speaks clearly to this need.

The community to be served by Big Room’s application - and the community that would be implicitly targeted by any application for "eco" - is an alliance of diverse, long-established, and internationally recognized environmental institutions with millions of members world-wide.

Formal international evidence of this community dates back to 1948 with the founding of the International Union for the Conservation of Nature. Re: The .ECO Top-Level Domain

Dear ICANN,

The Carbon Disclosure Project (CDP) is an independent not-for-profit organization working to drive greenhouse gas emissions reduction and sustainable water use by business and cities.

We provide a transformative global system for thousands of companies and cities around the world to measure, disclose, manage and share environmental information. We hold the largest collection globally of self reported climate change data. Through our global system companies and cities are better able to mitigate risk, capitalize on opportunities and make investment decisions that drive action towards a more sustainable world.

As a member of the global environmental community we are writing to express support for the creation of the “.eco” top level domain as proposed by Big Room Inc.

The community to be served by Big Room’s application - and the community that would be implicitly targeted by any application for “.eco” - is an alliance of diverse, long-established, and internationally recognized environmental institutions with millions of members world-wide.

To Whom It May Concern:

Conservation International is a global organization, with offices in more than 30 countries and projects in many more. Building upon a strong foundation of science, partnership and field demonstration, CI empowers societies to responsibly and sustainably care for nature, our global biodiversity, for the well-being of humanity. We imagine a healthy, prosperous world in which societies are forever committed to caring for and valuing nature, for the long-term benefit of people and all life on Earth.

As a member of the Global Environmental Community we are writing to express support for the creation of the "eco" top level domain, as proposed by Big Room Inc.

The community to be served by Big Room’s application - and the community that would be implicitly targeted by any application for "eco" - is an alliance of diverse, long-established, and internationally recognized environmental institutions with millions of members worldwide.

Formal international evidence of this community dates back as far as 1948, with the founding of the International Union for the Conservation of Nature. The environmental community has come together and organized itself with respect to specific issues over the years through a variety of formal and informal alliances, including for example IUCN, 350.org, the Antarctic and Southern Ocean Coalition, and since 1972, the United Nations Environment Programme.

The .ECO Community Organization reflects the community’s long-standing reliance on and use of the multi-stakeholder model to pursue community-wide goals, and is the appropriate voice to ensure that .ECO operates in furtherance of the goals, values, and interests of the environmental community.

Open letter to ICANN: Strong Concerns Over ICANN Auctions

Dear Mr. Rod Beckstrom, CEO and President
Dear Mr. Steve Crocker, Chairman, Board of Directors
Dear Mr. Kurt Pritz, Senior Vice President

Friends of the Earth International understands that ICANN, a not-for-profit "public-benefit" corporation, will be accepting applications for new top-level domains, or TLDs (like .com or .org) until 12-April, 2012, and that many of these resources will be put to auction.

Friends of the Earth International believes that the Internet is a public good, and as such, on principle, is against the auctioning off of public resources like top-level domains to the highest bidder.

Instead of being put first, the onus has been put on communities to prove their existence to ICANN. If they fail or are unaware of the process, resources that rightly belong to them will instead be auctioned to the highest bidder and used for private gain.

As a result, TLDs relating to the environmental community and environmental protection like .ECO, .GREEN, .EARTH, and many others associated with environmental and social justice may be put on the auction block for corporate interests.

The Internet is a critical empowering and organizing force. ICANN must not exclude communities by auctioning off public goods for corporate greed.

Nnimmo Bassey,
Chair, Friends of the Earth International
