**Subject: new gTLD-Application 1-1030-79531 .wien
Full Support for Change Request on revised Architecture for
Startup-Phases**

As outlined in the application for .wien the "Domain Name Council for .WIEN" (further referenced to as DNC) has been established.

Members of the DNC are highly qualified persons of the .WIEN community. They are representing economy, tourism, national and local administration, media, legal, education, consumers, competitors and supporters.

The DNC supports the .WIEN-management when it addresses strategic questions such as startup phases or enduser pricing.

The architecture of sunrise phases described in the change request is in accordance with applicable law and has been approved by the DNC. The DNC therefore fully supports the change request.

Thank you for the opportunity to support this application.

Yours sincerely

Prof. Dr. Dieter Scharitzer
Chair of the Domain Name Council for .WIEN
