Information Security Management Policy

The Board of CentralNic recognises the significance of integrity and security of information. CentralNic’s Information Security Management (ISM) policy is to maintain the highest standard of confidentiality, integrity and availability of data and information that is collected (customer, supplier) or generated (internally) by the organization, that it stays safe and does not conflict with relevant legislation.

The purpose of this policy is to protect the organisation’s information assets from all threats, whether internal or external, deliberate or accidental.

Corporate information is a critical business asset. The success of CentralNic’s business is dependent upon the company’s ability to store information securely, and retrieve and process it as and when required. Such information and the way it may be processed is subject to UK legislation.

Our Information Security Policy is achieved by a stringent set of controls, including policies, processes, procedures, software and hardware functions. These controls are continuously monitored, reviewed and improved, where necessary, to ensure that specific security and business objectives are met. This is operated in conjunction with other business management processes, and incorporates the applicable statutory, regulatory and contractual requirements.

Our ISM Policy Awareness Program is incorporated in our induction process, training and Quality Management System. The ISM policy is readily accessible internally and presented to existing and prospective clients.

In addition to employees; suppliers, contractors and sub-contractors of CentralNic are expected to adhere to our ISM policy.

All employees are empowered to take responsibility for Information Security and a robust process for identifying and reporting security risks and incidents is in place and is regularly reviewed.

Through compliance to applicable statutory, regulatory and contractual requirements, and the standard for Information Security Management ISO/ IEC 27001:2005, CentralNic will demonstrate confidence, integrity and credibility both internally and externally.
