ADAC New Community-Based gTLD Application for .ADAC

We refer to our application for a new community-based gTLD : .ADAC.

This application is submitted by the Allgemeiner Deutscher Automobil-Club e.V. ("ADAC"), a not-for-profit organization with about 18 million members and dates back more than 100 years.

ADAC is the actual organization governing the entire structure of companies and regional organizations that, together with their members, form the ADAC community. These ADAC Affiliates and regional ADAC organizations are rendering on a day-to-day basis a unique set of services and assurances to ADAC members who, in their turn, have organized themselves in regional and local clubs within the ADAC structure.

Members directly pay their membership contributions to ADAC, who uses part of these funds to fund these regional and local clubs in order to allow its members to organize various activities, exchange experiences and in general promote the interests of motorists, motor sports and tourism, to the benefit of the other members and the ADAC organization as a whole.

We believe that the .ADAC gTLD will add value to the organization, its regional and local clubs, and – more importantly – the ADAC members individually and as a whole.

By way of this letter, we would also like to confirm our continuous (financial) support and commit the funding to the .ADAC project, as described in our application.

Respectfully submitted,

Karl Obermair
