

## EPP Templates and Schemas

The EPP XML schemas are formal descriptions of the EPP XML templates. They are used to express the set of rules to which the EPP templates must conform in order to be considered valid by the schema. The EPP schemas define the building blocks of the EPP templates, describing the format of the data and the different EPP commands' request and response formats. The current EPP implementations managed by Verisign use these EPP templates and schemas, as will the proposed TLD. For each proprietary XML template/schema, we provide a reference to the applicable template and include the schema.

### XML templates/schema for idnLang-1.0 (IDN Language Tag)

- **Template:** The templates for idnLang-1.0 can be found in Chapter 3, EPP Command Mapping of the relevant EPP documentation, <http://www.verisigninc.com/assets/idn-language-tag.pdf>.
- **Schema:** This schema describes the extension mapping for the IDN language tag. The mapping extends the EPP domain name mapping to provide additional features required for the provisioning of IDN domain name registrations.

```
<?xml version="1.0" encoding="UTF-8"?>

<schema targetNamespace="http://www.Verisign.com/epp/idnLang-1.0"
  xmlns:idnLang="http://www.Verisign.com/epp/idnLang-1.0"
  xmlns="http://www.w3.org/2001/XMLSchema"
  elementFormDefault="qualified">

</schema>
```

### XML templates/schema for rgp-poll-1.0 (RGP Poll Mapping)

- **Template:** The templates for rgp-poll-1.0 can be found in Chapter 3, EPP Command Mapping of the relevant EPP documentation, <http://www.verisigninc.com/assets/rgp-poll-mapping.pdf>.
- **Schema:** This schema describes the extension mapping for poll notifications. The mapping extends the EPP base mapping to provide additional features for registry grace period (RGP) poll notifications.

```
<?xml version="1.0" encoding="UTF-8"?>

<schema targetNamespace="http://www.Verisign.com/epp/rgp-poll-1.0"

## XML templates/schema for whoisInf-1.0 (Whois Info Extension)

- **Template:** The templates for whoisInf-1.0 can be found in Chapter 3, EPP Command Mapping of the relevant EPP documentation, <http://www.verisigninc.com/assets/whois-info-extension.pdf>.
- **Schema:** This schema describes the extension mapping for the Whois Info extension. The mapping extends the EPP domain name mapping to provide additional features for returning additional information needed for transfers.

```

<?xml version="1.0" encoding="UTF-8"?>

<schema targetNamespace="http://www.Verisign.com/epp/whoisInf-1.0"
  xmlns:whoisInf="http://www.Verisign.com/epp/whoisInf-1.0"

### XML templates/schema for sync-1.0 (EPP ConsoliDate Mapping)

- **Template:** The templates for sync-1.0 can be found in Chapter 3, EPP Command Mapping of the relevant EPP documentation, <http://www.verisigninc.com/assets/consolidate-mapping.txt>.
- **Schema:** This schema describes the extension mapping for the synchronization of domain name registration period expiration dates. This service is known as "ConsoliDate." The mapping extends the EPP domain name mapping to provide features that allow a protocol client to end a domain name registration period on a specific month and day.

```

<?xml version="1.0" encoding="UTF-8"?>

  <schema targetNamespace="http://www.Verisign.com/epp/sync-1.0"

### XML templates/schema for namestoreExt-1.1 (NameStore Extension)

- **Template:** The templates for namestoreExt-1.1 can be found in Chapter 3, EPP Command Mapping of the relevant EPP documentation, <http://www.verisigninc.com/assets/namestore-extension.pdf>.
- **Schema:** This schema describes the extension mapping for the routing with an EPP intelligent gateway to a pluggable set of backend products and services. The mapping extends the EPP domain name and host mapping to provide a sub-product identifier to identify the target sub-product that the EPP operation is intended for.

```

<?xml version="1.0" encoding="UTF-8"?>

<schema targetNamespace="http://www.Verisign-grs.com/epp/namestoreExt-1.1"

### XML templates/schema for lowbalance-poll-1.0 (Low Balance Mapping)

- **Template:** The templates for lowbalance-poll-1.0 can be found in Chapter 3, EPP Command Mapping of the relevant EPP documentation, <http://www.verisigninc.com/assets/low-balance-mapping.pdf>.
- **Schema:** This schema describes the extension mapping for the account low balance notification. The mapping extends the EPP base mapping so an account holder can be notified via EPP poll messages whenever the available credit for an account reaches or goes below the credit threshold.

```

<?xml version="1.0" encoding="UTF-8"?>
