RE: Letter of support for the issuance of the internet domain name extensions “.INC”, “.LLP”, “.LLC” and “.CORP”.

Dear Paul;

I understand that Dot Registry is applying for the rights to manage new internet name extensions under ICANN's new GTLD program. I also understand that your application is a “members only” community application which restricts a company being awarded a new domain name to be a valid and existing US corporation of similar fidelity. I believe this differentiation in restrictive use will bring a higher level of credibility and trustworthiness to the users and owners of these sites.

I serve as CEO and control shareholder for Bishop-McCann, LLC. Our company operates a web site under the domain name www.bishopmccann.com. We are organized as a Missouri Corporation and are a member of the larger community of US based corporations and partnerships.

I am writing in support of Dot Registry's application for the issuance of these “strings” that would attempt to protect legitimate businesses and consumers from confusion or fraud; such restrictions would include measures to authenticate the active and good standing status of all corporations and partnerships who seek to register a second-level domain within the respective TLD as proposed by DOT Registry.

I wish you much success in this endeavor and look forward to the opportunity to be awarded a domain name with one of the above referenced extensions.

Sincerely,

Dan Nilsen
CEO
