Maintenance Agency for ISO 3166 country codes   ISO 3166-1 decoding table   ISO 3166-1 decoding table

ISO 3166-1 decoding table

This decoding table provides the user of ISO 3166-1 with an easy access to the definition of all 676 code elements available in the alpha-2 code of ISO's country code standard.

The content of this document is taken from two sources: The official code list of ISO 3166-1 and the list of reserved ISO 3166-1 code elements which contains information on code allocations which are not officially part of ISO 3166-1 (see "Reserved code elements"). The reserved code elements have different statuses with regard to restrictions on use within ISO's country code system. Some may be used - others must not be used.

These statuses - and their approximate meanings for the user of ISO 3166-1 - are described and colour-coded in Table 1. Tables 2 gives a colour coded, clickable matrix of all ISO 3166-1 alpha-2 code elements which is linked to Table 3 which gives the definition of the code element.

For more detailed information please refer to the section on "Reserved code elements" on our Website.

Table 1: Colour coding of statuses

Status of code element	Col.	What it means
Officially assigned code element		Code element may be used without restriction
User-assigned code element		Code element may be used without restriction
Exceptionally reserved code element		Code element may be used but restrictions may apply
Transitionally reserved code element		Code element deleted from ISO 3166-1; stop using ASAP
Indeterminately reserved code element		Code element must not be used in ISO 3166-1
Code elements not used at present stage (a)		Code element must not be used in ISO 3166-1
Un-assigned code elements		Code element free for assignment(by ISO 3166/MA only!)

Table 2: ISO 3166-1 alpha-2 code (26 x 26 matrix)

Notes:

(a) The World Intellectual Property Organization (WIPO) uses ten alpha-2 code elements for particular purposes in its Standard ST.3 which are not assigned in ISO 3166-1. The ISO 3166/MA will not use these alpha-2 code elements for assignment in ISO 3166 at the present stage.

(b) Official country names are given in CAPITAL LETTERS. Other names are given in normal orthography i.e including lower case letters.

(c) The list of ISO 3166-1 reserved code elements is only available in English, hence the lack of French names for entries which are not officially included in ISO 3166-1.

(d) Here the following pieces of information can be given:

- Acronym of organization or name of country on whose behalf a reservation was made
- Date of reservation (for transitional reservations)
- Abbreviation of source document for reserved code element
- Explanatory text
