gTLD String: 稳健 (.Jiankang)
Applicant Entity Name: Stable Tone Limited
Application ID#: 1-1708-88054

SPECIFICATION 11
PUBLIC INTEREST COMMITMENTS

1. Registry Operator will use only ICANN accredited registrars that are party to the Registrar Accreditation Agreement approved by the ICANN Board of Directors on [date to be determined at time of contracting], 2013 (or any subsequent form of Registrar Accreditation Agreement approved by the ICANN Board of Directors) in registering domain names. A list of such registrars shall be maintained by ICANN on ICANN’s website.

2. Registry Operator will operate the registry for the TLD in compliance with all commitments, statements of intent and business plans stated in the following sections of Registry Operator’s application to ICANN for the TLD, which commitments, statements of intent and business plans are hereby incorporated by reference into this Agreement. Registry Operator’s obligations pursuant to this paragraph shall be enforceable by ICANN and through the Public Interest Commitment Dispute Resolution Process established by ICANN ((posted at [url to be inserted when final procedure is adopted]), as it may be amended by ICANN from time to time, the “PICDRP”), Registry Operator shall comply with the PICDRP. Registry Operator agrees to implement and adhere to any remedies ICANN imposes (which may include any reasonable remedy, including for the avoidance of doubt, the termination of the Registry Agreement pursuant to Section 4.3(e) of the Registry Agreement) following a determination by any PICDRP panel and to be bound by any such determination.

Registry Operator agrees to perform the following specific public interest commitments, which commitments shall be enforceable by ICANN and through the PICDRP. Registry Operator shall comply with the PICDRP. Registry Operator agrees to implement and adhere to any remedies according to the PICDRP (which may include any reasonable remedy, including for the avoidance of doubt, the termination of the Registry Agreement pursuant to Section 4.3(e) of the Registry Agreement) following a determination by any PICDRP panel and to be bound by any such determination.

a. Registry Operator commits to strictly abide by governmental regulations relevant to the operations of the TLD, including those enacted by the Chinese government, which governs domain names and content associated with the domain names (for example, http://www1.cnnic.cn/PublicS/fwzxxgzcfx/201208/t20120830_35734.htm).

b. Registry Operator agrees to extend it’s anti-abuse policy to mitigate against sites that:
   a. Advertise, sell or otherwise encourage the use of counterfeit pharmaceuticals;
   b. Advertise, sell or otherwise encourage the use of products, devices or services found to be in violation of China’s State Food and Drug Administration (http://eng.sfda.gov.cn/WS03/CL0755/)
   c. Domain registrations in violation of abuse policies will be subject to suspension or rapid takedown. This commitment mirror the following regulation: “Domain Name Registry and Domain Name Registrars have the obligation of conducting website inspection in concert with the national governing departments, and request to suspend or cease the resolution service of the domain name.”

c. Notwithstanding 1. above, , the Registry Operator makes a commitment to support ICANN’s overarching goals of the new gTLD of enhancing competition and consumer choice, and enabling the benefits of innovation via the introduction of new gTLDs. The Registry Operator further acknowledges that at the time of this writing, it is uncertain whether or not the limiting of
distribution of new gTLDs to only a subset of ICANN Accredited Registrars would undermine ICANN’s own public interest commitments to enhance competition and consumer choice. In the absence of the confirmation from ICANN and the ICANN community that such undertaking would not run counter to ICANN’s overarching goals of the new gTLD program, or in the case that ICANN and/or the ICANN community confirms that indeed such arrangement (as described in 1. above) runs counter to ICANN’s public interest commitments and overarching goals, the Registry Operator shall refrain from limiting to such subset as described in 1.0 above.

d. Notwithstanding 2. and 3. above, the Registry Operator makes a commitment to support, participate in and uphold, as a stakeholder, the multi-stakeholder, bottom-up policy development process at ICANN, including but not limited to the development of Consensus Policies. For the avoidance of doubt, the Registry Operator anticipates that the PICDRP be developed as a Consensus Policy, or through comparably open, transparent and accountable processes, and commits to participating in the development of the PICDRP as a Consensus Policy in accordance to Specification 1 of this Agreement for Consensus Policies and Temporary Policies. Furthermore, that any remedies ICANN imposes shall adhere to the remedies specified in the PICDRP as a Consensus Policy.

e. Notwithstanding 2. above, the Registry Operator makes a commitment to support ICANN in its fulfillment of the Affirmation of Commitments, including to promote competition, consumer trust, and consumer choice in the DNS marketplace. The Registry Operator further makes an observation that the premise of this Specification 11 is predicated on addressing the GAC advice that “statements of commitment and objectives to be transformed into binding contractual commitments, subject to compliance oversight by ICANN”, which is focused on statements of commitment and objectives and not business plans. As such, and as reasonably understood that business plans for any prudent operation which preserves security, stability and resiliency of the DNS must evolve over time, the Registry Operator will operate the registry for the TLD in compliance with all commitments and statements of intent while specific business plans evolve. For the avoidance of doubt, where such business plan evolution involves changes that are consistent with the said commitments and objectives of Registry Operator’s application to ICANN for the TLD, such changes shall not be a breach by the Registry Operator in its obligations pursuant to this paragraph.
